## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to an article, classified in class 428, subclass 528.
- II. Claims 9-15, drawn to an article, classified in class 428, subclass 541.
- III. Claims 16-23, drawn to an article, classified in class 428, subclass 68.

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. Group I has a composite layer with a core defining the interior of the substrate. Group II has a laminated veneer lumber substrate and has no core. Group III has no laminated veneer lumber substrate and no core.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. McCollom on June 20,2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
